# Sustainability

At Warrell Richards, we are passionate about reducing our carbon footprint, this is one reason we choose to design and build metal toolboxes over the plastic alternative.

**Metal is a material that is endlessly recyclable –**

for example, Aluminium drinks cans can be on sale as another can in just 60 days, It's crucial we each play our own part in making sustainable choices and recycle our waste metal.

**How does plastic harm the environment?**

Plastic stays around an extremely long time, threatening wildlife and spreading toxins, Plastic also contributes to global warming. Almost all plastics are made from chemicals that come from the production of planet-warming fuels (gas, oil and even coal). Our reliance on plastic prolongs our demand for these dirty fuels, burning plastics in incinerators also releases climate-wrecking gases and toxic air pollution

To further our carbon footprint, we only use reclaimed / repurposed pallets.

Our used pallets come from the recycling sector and the circular economy.

used pallets are repaired by replacing broken parts with either new or reusable parts.

Used pallets that no longer meet the quality requirements are crushed and follow the energy recycling process.

We use FSC approved Enviro cardboard boxes to package your items – protecting your goods & the planet - **Why use FSC certified cardboard?**

Carbon benefits - Trees absorb CO<sub>2</sub> as they grow

Every cubic meter of wood used as substitute for other materials displaces an average of 1.1 tons CO<sub>2</sub>.

If this is added to the 0.9 tons of CO<sub>2</sub> stored, then each cubic meter of wood can save a total of 2 tons of CO<sub>2</sub>

## Ready for the future

More and more European municipalities are announcing that in the future, inner-city areas will only be accessible to zero-emission vehicles — making fully electric trucks an important proposition.

Fully electric solutions also offer the transport sector an opportunity to play its part in helping to meet the challenges of global warming and local air quality.

## Suitable lockers for your future ready vehicle

All of our products are made from sustainable materials.

Our Plain aluminium and aluminium chequer plate products are extremely lightweight, No need to compromise on quality for a lightweight storage solution.

We say no to plastic.

Our materials are 100% recyclable

Reduced CO2 footprint –

When using green energy & sustainable products you benefit from reducing your transport operations' CO2 footprint, as well as helping you achieve your sustainability goals.

In addition, electric powertrains are very quiet, which is ideal for evening or night-time deliveries.

## Dimensions

L X H X D

Length – From one side to the other

Height – From the top to the bottom

Depth – From the front to the back

All of our measurements are in millimetres

Notes

55mm Lip / Double fold the around the aperture of the locker, with rubber seal attached

Increases strength and durability

Decreases aperture by 110mm total in length and height but still having the ability to use the space inside

This also acts as a rain soakaway drainage system

The door makes up 60mm of the measurement  
(Included in the total measurement)

Still able to use the 60mm of space behind the door

When open the door overhang requires 30mm of clearance

Need the door to sit flat?

If for any reason you need your doors to open level, Simply discuss this with the sales team prior to purchase

## **Aluminium Chequerplate / Treadplate / 5 Bar**

The benefits of this versatile material are numerous, including:

Slip resistant – Raised pattern provides traction on steps, ramps, ladders, floors, tailgates, running boards, catwalks, loading docks, etc....

Corrosion resistant – Made of corrosion resistant metals, provides years of service even under the toughest conditions, including marine locations

Hygienic – Easy to wash down and is able to resist damage from strong, corrosive cleaning agents.

Protective – Prevents damage to walls, doors, corners, skids etc... Also protects bumpers, treads, truck beds, tailgates, bodies of commercial, off road, and other vehicles

Lightweight material

Decorative - Having a heavily raised 5-bar pattern, Its both functional and decorative and is commonly used in vehicle construction.

Can be painted / powder coated or left in its natural state

## **Plain Aluminium – 5251 Grade**

Medium strength

High corrosion resistance particularly in marine environments

Lightweight material

Can be painted / powder coated or left in its natural state

5251 is typically used in: Boats, Paneling and pressings, Marine structures, Aircraft parts, Vehicle panels, Furniture tubing, Silos and Containers

## Stainless

304 Grade – High grade

High strength

Excellent corrosion resistance

Durable

Hygiene - The hard metallic surface makes it difficult for bacteria to adhere and survive. Its easy clean ability makes it the first choice for strict hygiene conditions.

Recyclable - Stainless steel is 100% recyclable. In fact, 50% of new stainless steel comes from old remelted stainless steel scrap, thereby completing the full life cycle.

Longevity - When the total life cycle costs are considered, stainless is often the least expensive material option.

## Mirrored Stainless

Mirror finish has been finely polished into a mirror,

unlike the bright annealed mirror finish that has been acid dipped leaving a murky mirror effect) – Beautiful finish

Most commonly used to make mirrors and reflective items

## Polished Stainless

Has a satin like finish, The most commonly used stainless for the austenitic look and finish

## Circled Stainless

Also known as flowered stainless, Easy to maintain, reflective surface, highly decorative and eye-catching finish

### Concealed pivot hinge - Lift off

#### Material

Hinge & pin: steel, white zinc plated

#### Size

60.0 x 39.0 x 24.5

#### Feature

Simply slide the pins out from inside the hinge and you can completely remove the door, Great for ease of use, installation and cleaning

SKU
CPHLO

SKU
V2THL

### Vector T2 Locks

Can be used as a direct replacement for T-Locks

Can be turned 180° left and right

Installation is swift and easy with a mounting bracket

IP65 Dust and water protected

Zinc die cast - black powder coated

stainless-steel dust shutter

Supplied keys: 2 - Keyed alike

Standards IP65DIN EN 61373

### Stainless Steel Folding T-Lock

Stainless steel polished

Handle turns clockwise

Dust cover protects the locks

Adjustable depth bent up tongue

Foam gasket

Heavy duty and made to last

4 Mounting Holes

Supplied keys: 2 Keyed alike

SKU
SSTHL

## Steel horizontal fitting kit

2 sizes available

250 x 300 - For use with lockers with a depth equal to 300mm

300 x 400 - For use with lockers with a depth equal to 400mm

Come complete with washers, bolts & elongated holes for ease of use

Powder coated to protect against the elements

## Adjustable brackets

These brackets make it easy to fit any locker - without compromising on strength.

Designed for ease of fitting / use, Heavy duty

Powder coated to protect against the elements

## Adjustable rear cab module bracket / Catwalk frame

This bracket make it easy to fit any of our rear cab modules.

Designed for ease of fitting / use

Heavy duty

Powder coated to protect against the elements

Can also be used to fit catwalks
